WORK EXPERIENCE

• Incedo Inc. - AI & Data Division

SDE-1- AI&Data

January 2025 – Present

Recent Impact→ GenAI Services Platform for A US-Based Tier-1 Telecom Giant

- **Engineered a scalable, dual-service Agent Builder using FastAPI and SQLAlchemy** for metadata management, paired with a LangGraph execution engine to materialise single agent based workflows,that supports dynamic Tools
- **Implemented stateful agent persistence by integrating Redis checkpoints**, enabling seamless conversation recovery and multi-node scalability for complex agentic workflows.
- **Automated the full backend regression suite** using Pytest, reducing client-reported defects from **20–25 bugs per sprint to 4–5** (roughly~80% reduction) and cutting manual QA effort each release cycle.
- Responsible for the end-to-end feedback loop for client-reported issues, prioritizing bug fixes and quality improvements to ensure high user satisfaction and product stability

OTHER PROJECTS

• VIVEK — RAG System for the Garuda Purāṇa

Ongoing

Python · FastAPI · FAISS · HuggingFace Embeddings · Docker · GCP · Typescript · React

- Architected an end-to-end RAG pipeline for natural-language querying of the Garuda Purāṇa corpus using FAISS vector indexing and 1024-dimension English text embedding model BAAI/bge-large-en-v1.5.
- Eliminated cold-start overhead by engineering an in-memory model cache; containerised and deployed the service to GCP Cloud Run via Docker, enabling serverless scaling.

• Clinical Trial Planning Platform — Global Biotech POC

6 Months (2024)

FastAPI · PostgreSQL · AWS (EC2, EKS, S3) · TypeScript · React

- Owned delivery of site-feasibility modules, investigator landscape views, and KPI dashboards within a microservices architecture deployed on AWS EKS.
- Co-designed service decomposition and optimised PostgreSQL queries for data-heavy investigator-landscape endpoints, improving analytical response times.

TECHNICAL SKILLS

- **Languages:** Python, Java (*primary*) • Kotlin, C (*secondary*) • JavaScript / TypeScript
- **Backend & Technologies:** FastAPI, Django, Flask • Async programming • Pydantic v2 • SQLAlchemy • RESTful API design • OAuth 2.0 • Microservices
- **Generative and Agentic AI:** RAG pipelines • Vector search (FAISS, ChromaDB) • Embedding pipelines • Generative and Agentic workflow orchestration • LangChain / LangGraph • Prompt engineering • LLM internals (architecture, fine-tuning) • Basic ML/DL- Scikit-learn, Pandas, NumPy
- **Databases:** PostgreSQL, AWS Aurora, MongoDB, Firestore • ChromaDB (Vector DB) • ORMs (SQLAlchemy)
- **Cloud & DevOps:** AWS (Certified: EC2, EKS, S3, Aurora) • GCP (Cloud Run, Compute Engine, Artifact Registry) • Docker • CI/CD (GitHub / GitLab) • Pytest
- **Tools:** PgAdmin • Jenkins • Jira • Postman • Google Colab

INTERNSHIP EXPERIENCE

• Samsung BRI

Research Intern

Aug 2022 – Feb 2023

- Co-Developed a solution to measure the Log Score: Assessing log volume impact from a given codebase; awarded **Certificate of Excellence** for the same.

• Steel Authority of India (SAIL), R&D Centre

Summer Intern — Research and Development Labs, SAIL

Jun 2023 – Aug 2023

- Assigned to the Smart Systems Lab, Research and Development Centre for iron and steel (RDCIS), Ranchi, Jharkhand
- Assigned machine learning project 'APRIC'
- Exposure to LLM's and ChatBots, specifically GPT-2

• Airports Authority of India (AAI)

Summer Intern — CNS Department

May 2022 – Jul 2022

- Gained operational exposure to Communication, Navigation & Surveillance systems and local network infrastructure at a major airport authority.

CERTIFICATIONS & ACHIEVEMENTS

- **AWS Certified Cloud Practitioner**
- **IBM Agentic AI Professional**
- **GATE 2025 Qualified — Computer Science & Engineering**
- **Certificate of Excellence — Samsung BRI Research Internship**

July 2023
May 2026
2025
Feb 2023

EDUCATION

- B.Tech, Computer Science & Engineering — Vellore Institute of Technology, Vellore | **CGPA: 8.07**
- 10+2 (CBSE) — Delhi Public School, Ranchi, Jharkhand | **Score: 95%**
